Strategic Plan for Capital Planning

Drawn from the Wayne College Strategic Plan, this document provides focus for the Wayne College Capital Plan over the years 2008-2010.

Mission: The Campus Master Plan establishes a vision for the campus that reflects the College’s academic mission, as well as the goals and objectives of the College community. It provides the underpinning for the decision-making process. To successfully achieve the College’s academic mission, adequate facilities must be provided. Through the development and use of the Campus Master Plan we have determined that the projects detailed in the Capital Plan will support our continued success.

The priorities in this plan derive directly from those in the Wayne College Plan, as identified herein.

Priority 1: Enhance physical, social, and learning environments to encourage student engagement with the College. (1D)

A. Ensure that the H-Building meets these needs through the creation of comfortable student-life space, as well as up-to-date classrooms and space for student activities.
B. Create an entrance to campus from North Crown Hill to improve access to campus.

Priority 2: Carry out the construction of the D-Wing and H-Building projects. (5B)

A. Complete this project on time and within budget. Groundbreaking is planned for April 2008 with an expected completion date of August 2009 for the H-Building and December 2009 for the D-Wing renovation. A budget of $8.5 million has been established.

Priority 3: Revise the 2001 Campus Master Plan. (5E)

B. Work with The Collaborative to create an updated graphic of the Campus Master Plan that depicts the current plans for campus growth and improvement.

Priority 4: Develop instructional spaces that support and encourage different teaching-learning strategies and styles. (5F)

A. Convert the two remaining classrooms (C220 and C111) that have tablet arm chairs to more flexible furniture (e.g. tables and chairs) while maintaining the needed seating capacity.
B. Work with the Instructional Technology group to develop appropriate enhancements to existing classrooms.
